NEW TEACHER INDUCTION PROGRAM

<h2>Planning, Assessment and Evaluation</h2>	Professional development and training, specific to the needs of new teachers, should include the following core content:									
	Curriculum-focused long- and short-term planning, keeping the end in mind: what students need to know and be able to do	Selecting and using ongoing classroom assessment strategies and data to inform instruction and plan appropriate interventions to improve student achievement	Using assessment and evaluation strategies that are appropriate to the curriculum and the learning activities, are fair to all students, and accommodate the needs and experiences of all students	Providing students with numerous and varied opportunities to demonstrate the full extent of their achievement without overwhelming them	Collecting multiple samples of student work that provide evidence of their achievement	Referring to exemplars to assess and evaluate student work	Using provincial achievement charts to assess and evaluate student work	Selecting and using effective strategies to support students' self-monitoring, self-assessment, and goal-setting for their own learning	Informing and helping students and parents to understand the assessment and evaluation strategies to be used and giving them meaningful feedback for improvement	Applying provincial report card policies and board guidelines for reporting on student achievement
